Bi - Fold Doors

The ultimate folding door

Easifold 3000 is the ultimate folding door system which changes the relationship between the interior and exterior of your home or business – by making alfresco space available, with the minimum of effort, in moments.

Designed to high standards

Created from high density aluminium frames, they conform to every current building regulation. They are designed and manufactured to exacting standards in the United Kingdom.

Improved access

With a wide range of opening variations, the nature of the design allows the ultimate in free running, lightweight operation, courtesy of Easifold unique Freeglides enclosed track system.

Security

Internally beaded and using a high security multipoint hook locking system to the lead door conforming to the much accredited 'Secure by design' ABI and BBA standards together with high security hinges make the Easifold 3000 system state – of- the – art, safe reliable and long lasting.

Colours

Every shade in RAL colour system (RAL is a colour matching system used in Europe) and the ability to provide dual colours for interior and exterior finishes

Thermally efficient

The aluminium frames are constructed using the very latest technology and are Certified to conform to current building regulations, with severe weather rating achieved to the highest British Standards available.

Who are they for?

Easifold are suitable for both domestic and commercial installations from the most bijoux inner – city dwelling to modern restaurant front or bar.

Timeless appeal

Their timeless appeal makes them equally perfect for both the most contemporary home and classic period property with a modern twist of glass and light.

Simplicity of design

The doors reflect the simplicity and proportions of an ideal door design with the perfect relationship and ratio between glass and frame.

Guaranteed for Ten years under manufacturers warranty
