Combination Conservatories

A combination of designs are available to tailor a building specific to your individual needs.

Combine a sun lounge with a Victorian or two Victorians together, the results of which are featured on this page. The combinations are endless and the choice is yours

The beauty of a combination conservatory is not only the individuality of the style but the vast space it will offer you. Many can be used for dual purposes such as separate sitting area and play area. Or perhaps for the active household even to enclose a swimming pool.
